from \$90 to \$220 each* (discount over 4)

Extra Large: (trees) – (15 gallon + container & 20"+ w X 15"+ h B&B)

from \$225 each* and up

Digging Conditions Explained: Pricing for tree and shrub installation is based on size of materials being planted (root ball & height) along with tree and shrub location (how far from driveway / paved area, muddy location as well as soil digging conditions) If there is excessive roots from existing (or prior existing) trees, or ground is hard, packed clay soil, a second location will be required as back – up (plant moving location could be 6 inches or 6 feet).

Contractor WILL NOT KNOW digging conditions before digging occurs, only after digging moves forward.

NOTE: All pricing is estimates, pricing can change w/ upgraded materials or replacement materials required.
